

Themed Assemblies
Results from Parents' Evaluations

Lots of parents joined us for our **TERRIFIC TECHNOLOGY** Assembly on Thursday 12th January 2017. Seven parents told us what they thought about the opportunity to join us. These were their responses:

1. What did you learn about our school today?

How the children work together in a team.
Hard work was acknowledged for their designs. Very creative.
Lots of interesting topics and lessons to make learning fun for the children.
The children enjoyed their presentation.
Their enthusiasm means they enjoyed the lessons. The teachers therefore taught the lessons well.
Great that children able to remember what they did a long time ago.
The children listen to Mrs Patmore and their peers.
Kids are very well behaved.
Teachers friendly and in charge.
They enjoy the topic and have pride in showing the work they have done.
Good teamwork in groups.
Children mostly behaved.

2. What did you learn about our TECHNOLOGY curriculum?

Children seemed interested and proud of their work.
Good topic focus for each year group.
It is very well thought out.
Well done and helps children learn about today's advancements.
It relates well to the other subjects like English, maths and science.
How many ways the school cover the same topic and keep it interesting and fun for each year group.
Learned that designing and making can be tricky but with hard work and team work it can be done well.

3. What do you think the children had learnt about technology throughout the school? Do you think that there was a progression of knowledge and skills from Y1 to Y6?

There was definitely a progression.
The children are confident when talking about their work.
The progression of the knowledge needed to build their models was impressive – from models which could be pushed to solar power!
They have obviously learned lots about design and evaluation through the years.
The projects were well thought out and the children understood the subject well.
They appreciate the creativity in their designs.
The progression through the years is well ordered from the theory and practical parts of the curriculum.

4. What were your thoughts about how well the children behaved as they came into assembly? (1 is low, 5 is high)

				100%
1	2	3	4	5

5. What were your thoughts about how well the children behaved during the assembly? (1 is low, 5 is high)

				100%
1	2	3	4	5

5. Any further comments:

- "I enjoyed seeing all the work from students. They did very well."
- "I wish more kids get a chance (to share) as it is a very good skill for them to learn."
